

DEBASIS PATRA

FULL-STACK DEVELOPER | REACT.js • NODE.js • REST APIs • MYSQL

India | +91 9874140224 | patradip6@gmail.com | linkedin.com/in/debasis-patra-219a3b272 | github.com/dippatra123

PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of hands-on experience building and deploying production internal applications, dashboards, REST APIs, reporting systems, and workflow automation. Strong in React.js, Redux Toolkit, Node.js, Express.js, MySQL, Git, and production deployment. Experienced in taking operational problems from requirements through frontend, backend, database, authentication, reporting, and deployment, with a strong bias toward practical, user-focused solutions.

EXPERIENCE

Century Plyboards (India) Limited

EDP Executive (Developer)
Jun 2024 – Present

- Build and maintain end-to-end internal business applications using React.js, Redux Toolkit, Node.js, and Express.js, deployed and actively used across multiple departments.
- Design and implement REST APIs and MySQL data models supporting core operational workflows and reporting.
- Develop authentication, role-based access control, dashboards, reporting modules, and workflow tools used in daily operations.
- Automate manual operational workflows and Excel-based reporting, reducing repetitive data-entry and reporting effort across teams.
- Own production deployment and maintenance on internal servers using PM2 with Apache/Tomcat reverse-proxy configuration.
- Translate real operational requirements into maintainable software, working across frontend, backend, database, and deployment layers.

Century Plyboards (India) Limited

Data Entry Operator
2019 – 2024

- Managed ERP and production data across manufacturing operations, developing deep understanding of operational workflows that later informed application design and automation.

Induction Electric Transformer Company

Testing & Manufacturing Engineer
2016 – 2018

- Performed transformer testing and quality assurance in line with manufacturing standards.

SELECTED PROJECTS

Image-to-JSON Data Processing & Database Workflow | AI / Full Stack

- Built a workflow that converts information from images into structured JSON and prepares the resulting data for database storage, demonstrating practical AI-enabled automation and end-to-end product thinking.

Gate Pass Management System | React.js • Node.js • MySQL

- Built a complete gate pass management solution with secure authentication and MySQL integration, eliminating manual logbook tracking for visitor and vehicle entry/exit.

Electrical Energy & Production Monitoring System | React.js • Node.js

- Built a machine-wise dashboard tracking electrical energy consumption and production output across shop-floor machines.
- Added analytics views comparing energy usage against production output per machine to identify inefficient or high-consumption machines.

Excel Data Upload & Reporting System | React.js • Node.js

- Implemented CSV/Excel upload, validation, and automated report generation, replacing manual reporting processes across teams.

QR-Based Product Tracking System | React.js • Node.js • MySQL

- Built QR-based product tracking across production stages with timestamps and real-time visibility into process duration and bottlenecks.

TECHNICAL SKILLS

Languages	JavaScript, HTML5, CSS3
Frontend	React.js, Redux Toolkit, Bootstrap
Backend	Node.js, Express.js, REST APIs
Database	MySQL
AI / Automation	Image-to-JSON workflow, AI-enabled data processing
Tools & Practices	Git, GitHub, Postman, VS Code
Deployment	PM2, Apache, Tomcat

EDUCATION

B.Tech, Electronics & Instrumentation Engineering — RCC Institute of Information Technology, 2015
